Local Parks

- **Claudette Cain Park** is located on the banks of the Rideau River, across River Road from Riverside South. The park can be accessed via a signalized pedestrian crossing. This park has a soccer field, many walking trails and a variety of play structures. There is also access to the Rideau River waterfront..
- **Four Seasons Park** is located on Spratt Road between Earl Armstrong Road and Shoreline. This park has a number of play structures, a water spray area, a baseball diamond, and a skating rink and toboggon hill in the winter.
- **Mountain Meadows Park** is located along Spratt Road between the two Canyon Walk intersections and beside École élémentaire catholique Bernard-Grandmaître. This park has a number of play structures, a water splash area, a soccer field and a skating rink in the winter.
- **Spratt Park** is located along Spratt Road adjacent to Steve MacLean Public School. The park includes a number of play structures, a soccer field, a multi-use paved area and boarded rink in the winter.
- **Nimiq Park** is located at 5058 North Bluff drive, with access from Black Sage Crescent as well. The park opened in Summer 2011, and includes a number of play structures, a soccer field, and a large shade structure.

[The Strandherd-Armstrong Bridge](#)

Funding Program: Building Canada Fund

Agreement Signed:

Total Project Cost: \$49.9 Million

Federal Contribution: \$15.9 Million

Anticipated Project Completion Date: 2012

The Strandherd-Armstrong Bridge will connect Strandherd Drive (to the West) and Earl Armstrong Road (to the East). The Strandherd-Armstrong Bridge will consist of the following:

- Four (4) general purpose vehicle lanes and two (2) auxiliary turning lanes;
- Two (2) dedicated transit lanes;
- Two (2) on-road cycling lanes; and,
- Sidewalks in each direction.

The project has been identified in both the South Nepean Secondary and the Riverside South Community Design Plans as a critical continuous east-west arterial road within the South Urban Community.

The construction of a new bridge will take pressure off existing bridges at Hunt Club Road and Manotick, and will provide an east-west corridor in the South Urban Community sector of the city, thus improving traffic flows.
